

TRACKING VITAL SUPPLIES

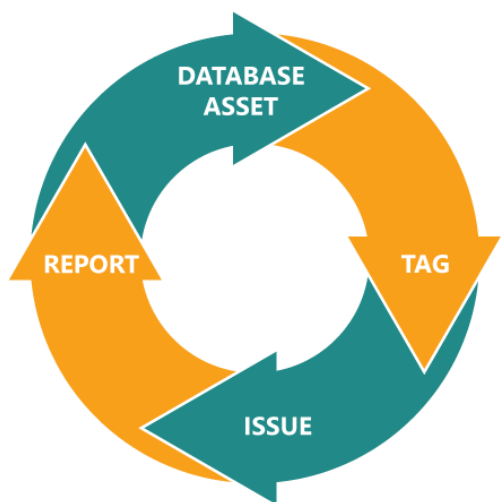

How are you tracking equipment and consumables received and issued in response to COVID-19?

Knowing what supplies you have on-hand at any given time is extremely important to make quick decisions when they matter most. When faced with a Type 5 to Type 1 event, federal, state, and local agencies need to be able to access accurate data immediately. This helps ensure that requests for support and assistance be as timely as possible.

Salamander's ASSET MANAGEMENT and INVENTORY APP work hand-in-hand to ensure you have real-time data that can be easily access from anywhere. Begin by quickly importing any existing data into SalamanderLiveTM and start tracking immediately.

What you can expect from Salamander's ASSET MANAGEMENT tools:

- Access to numerous reports, pulling real-time data
- Tie distribution of assets to specific events
- Set alerts to re-order supplies, perform maintenance, and handle inspections
- Time / date stamp activity for visibility
- Issue and Return assets from any iOS or Android device
- Perform audits and adjust quantities on the fly

Use Case Scenarios

1. Track incoming critical supplies coming in from the Strategic National Stockpile and its distribution to local healthcare facilities.
2. Increased visibility of supplies to make informed decisions on when to order more or when to reach out to local government for assistance.
3. Easily pull inventory reports to send to FEMA.
