EVERY CALL ACCOUNTABILITY

Take control of incident accountability and enhance mass communication with Salamander's Every Call Accountability. Whether you are a small or large department with career or volunteer responders, Salamander will decrease response time, increase situational awareness, and enhance interoperability between agencies.

EVERY CALL BENEFITS

Save Time
Every minute counts in an emergency. Instantly access and manage events with Salamander's mobile and PC based solutions. Salamander automates upfront accountability to save time. By integrating Salamander with CAD, information captured by dispatch automatically creates events with all the accountability details you need.

Increase Situational Awareness
Before leaving the station, you will have up-to-the moment information at your disposal. This includes the event type, address, assignments, units dispatched, and more. Customize the information based on your needs.

Interoperability Between Agencies
Standardize your accountability processes to be more interoperable within your jurisdiction. Establish a common operating picture for everyone involved to be more efficient.

Increased Accuracy
Improving on the manual workflow components for creating an event will instantly increase accuracy. Responders can easily focus on what matters most, response efforts.

FAQ

Question: What CAD solutions can you integrate with?
Answer: It does not matter what solution you have; we can customize to fit your needs.

Question: What methods do you use to integrate?
**Answer:** We can integrate through an API, Web Services, or Email.

Question: Can we keep our current scheduling solution?
Answer: Yes, Salamander can integrate with your current CAD solution as well as your scheduling solution.

Question: How affordable is the solution?
Answer: Salamander has created a way to keep costs down based on department sizes. Contact the Sales Department for more information.

HERE IS HOW EVERY CALL ACCOUNTABILITY WORKS:

EXISTING DISPATCH WORKFLOW

Emergency occurs and dispatch is contacted → Dispatch triggers event within CAD

SalamanderLive Automation

Event information and resources are automatically pushed to SalamanderLive

Examples include: event name, address, assignments, and units dispatched.

Mass communication is sent to all resources

Resources remotely check in to event with TAG APP

Manage the event from start to finish through the TRACK APP

All event activity is logged in SalamanderLive for real-time and after-action reporting

Standardizing Manual Accountability

Establishing a standard that all fire departments within your jurisdiction can follow is key for accountability. Contact Salamander today to standardize your manual accountability processes. We offer an array of supplies including 3-up tags, IM binders, complete tag assembly, and more.
