

EVERY CALL ACCOUNTABILITY

Take control of incident accountability and enhance mass communication with Salamander's Every Call Accountability. Whether you are a small or large department with career or volunteer responders, Salamander will decrease response time, increase situational awareness, and enhance interoperability between agencies.

EVERY CALL BENEFITS

▶ Save Time

Every minute counts in an emergency. Instantly access and manage events with Salamander's mobile and PC based solutions. Salamander automates upfront accountability to save time. By integrating Salamander with CAD, information captured by dispatch automatically creates events with all the accountability details you need.

▶ Increase Situational Awareness

Before leaving the station, you will have up-to-the moment information at your disposal. This includes the event type, address, assignments, units dispatched, and more. Customize the information based on your needs.

▶ Interoperability Between Agencies

Standardize your accountability processes to be more interoperable within your jurisdiction. Establish a common operating picture for everyone involved to be more efficient.

▶ Increased Accuracy

Improving on the manual workflow components for creating an event will instantly increase accuracy. Responders can easily focus on what matters most, response efforts.

FAQ

Question: What CAD solutions can you integrate with?

We can integrate with any CAD solution that has capabilities for integration.

Question: What methods do you use to integrate?

Our standard methods to integrate are through API or Email.

Question: Can we keep our current scheduling solution?

Yes.

Question: How affordable is the solution?

Salamander has created a way to keep costs down based on department sizes. Contact Sales for more information.

EVERY CALL WORKFLOW:

Emergency occurs and dispatch is contacted

Dispatch triggers event within CAD

SalamanderLive Automation

Event information and resources are automatically pushed to SalamanderLive

Examples include: event name, address, assignments, and units dispatched.

1. Mass communication is sent to all resources
2. Resources remotely check in to event with TAG APP
3. Manage the event from start to finish through the TRACK APP

All event activity is logged in SalamanderLive for real-time and after-action reporting

Standardizing Manual Accountability

Establishing a standard that all fire departments within your jurisdiction can follow is key for accountability. Contact Salamander today to standardize your manual accountability processes. We offer an array of supplies including 3-up tags, IM binders, complete tag assembly, and more.
